Taste of STEM: Building an appetite for STEM through FUN!

Stephen Mack

VIRTUAL REALITY

Engage your creative side and imagine, plan, build and visit your own virtual reality world. Participants will learn some basic computer programming skills to customize their worlds. Students will be able to use their smartphones to walk through their imaginations. The beginning of an incredible journey to the endless possibilities of Virtual Reality! There will be an extra \$10 fee for Google Cardboard VR glasses that we will provide.
