

Catch the Wave Swim Club Presents

Call today for this **FREE** water Safety Class. Several times a year Catch the Wave Swim Club holds "**Safety Week**" as part of our complete water safety program. During this week of regular lessons focus on safety skills and preparing our swimmers for handling water emergencies. The most stunning example of this is when we ask our swimmers to jump into the water with their clothes on. Water makes clothes heavy and unwieldy, shoes make kicking more difficult – sensations that panic many children at first. That's why we want their first experience swimming with their clothes on to come in a controlled environment where their instructor stands ready to help the swimmer float and get back to the wall. Call today for the **FREE SAFETY CLASS**.
